

**Wearable Mobile™** has been **designed by professionals for professionals.**

For those who need to remain in mobile contact; from NHS staff, Healthcare, Engineers, Airlines, Security and Police, to Sporting Professionals, Ground-crews, Events crews and Backpackers.

### What's the problem?

- Mobile phones are easily lost, misplaced, damaged or stolen during a hectic day.
- Storing your phone in a pocket isn't ideal, there are many risks, such as; overheating, damage from the phone falling out or bending from sitting down and pick pockets.
- If you struggle to find your phone in a carry bag or back pack, or pockets are too small for your phone, this is **your** solution.

Introducing the Stylish, Robust Multi Wearable Mobile Accessory...

### Wearable Mobile™ is the Solution

- Enables you to have your device **accessible** at all times.
- Quick and easy access, attach to **Lanyard, Belt or Bag Loop.**
- **Lightweight** and **robust** with a **stylish** design, enabling you to wear it on a lanyard for long periods of time, keeping your hands free.
- The copper centre **lowers the risk of overheating** from body heat especially during hot weather.
